

ScopeValet™ AAMI Level 4 Procedure Gown

Item No. 345EG4

AAMI Level 4 Procedure Gown: HIGHEST FLUID & MICROBIAL BARRIER PROTECTION

Defense against blood-borne pathogens in critical zones

Needed for long, fluid-intensive procedures for operating on patients with potential blood-borne pathogen risk

ScopeValet™ PROCEDURE GOWNS were designed to meet the specific protection and comfort requirements for endoscopic and other medical procedures. Level 4 Procedure Gown is made of HaloGuard, a composite breathable laminate, which was developed for the rigorous standards of AAMI IV material requirements per ASTM F1670 (Synthetic Blood Test) and ASTM F1671 (Bacteriophage Test).

HaloGuard Composite Material Features

- Industry leading barrier performance
- Soft Touch, low noise material for increased comfort
- Highest level of confidence in our most breathable nonwoven protection

Procedure Gown Features

- One size fits all; not individually packaged
- Disposable, one time use
- Protective coating makes gown impervious to fluid penetration
- Latex free
- Lightweight design and breathable to keep staff cool
- Premium elastic cuffs
- Adjustable Velcro® neck closure to allow for easy on/off and improved usability for workers with mild arthritis or limited mobility
- During removal, the wearer can easily contain contamination by rolling the gown into a ball before discarding it

One Size Fits All

Premium Elastic Cuffs

Adjustable Velcro® Neck Closure

Guideline References

AAMI Level 4 Gowns: This classification describes surgical gowns, isolation gowns, and protective apparel that demonstrate the ability to resist liquid and viral penetration in a laboratory test, ASTM F1671 (Standard test method for resistance of materials used in protective clothing to penetration by blood-borne pathogens using Phi-X174 bacteriophage penetration as a test system).
