To us, sustainability isn't just a commitment, it's part of our legacy. We launched the first biodegradable single-use glove in 2012 as the first step in our sustainability journey: a way to reduce the impact that gloves have on the environment. This strategy remains our primary focus as we expand Eco Best Technology® into every color and inch thickness within our product offering, including reusable gloves.

This way we can meet the demands of today, without compromising for tomorrow. Today you can choose from a wide range of gloves with Eco Best Technology®, that meets a specific application need.

# AMERICA FIRST

FAYETTE, AL DIVISION

## INVEST. CREATE. PROTECT.

### RESHORING DOMESTIC PRODUCTION TO PROTECT THE HOMELAND.

The need for single-use personal protective equipment (PPE) has spiked due to COVID-19. SHOWA's decision to invest and expand in our Fayette, Alabama, operation *before* the pandemic reflects its long-standing commitment to domestic manufacturing and creating American jobs.

SHOWA is working with agility to meet the rising needs of businesses, healthcare organizations, and government entities. As an end-to-end integrated manufacturer with nitrile sourced in America, partners can trust SHOWA to deliver a top-quality U.S. product. In addition, we proudly partner with our network of authorized medical and industrial distribution channels to meet the demands of domestically made PPE.

## Make PPE in America Act

H.R.2720

“Congress recognized the problems a lack of domestic PPE production can cause. That is why Congress enacted the Make PPE in America Act as part of the Infrastructure Investment and Jobs Act. The Make PPE in America Act requires the Departments of Homeland Security, Health and Human Services, and Veterans Affairs to source their PPE from domestic sources. It also requires these agencies to issue contracts for not less than two-years for PPE.”

-Rep. Budd, Ted (R-NC-13)
