# THE **SHIELD**

## NAIL GUN HAND PAD

*Known as The Shield, this hand pad is the result of several years of research and development with industry experts.*

### FEATURES

- Kevlar® ballistic armor plating is geometrically placed to protect areas most vulnerable to potential nail gun injuries
- Made from split leather and sewn using Kevlar® thread for sturdy construction and increased durability
- Reinforced thumb crotch provides for added strength in glove construction
- Features adjustable Velcro® brand fasteners that ensure a snug and comfortable fit over existing safety glove
- To be used as a complement to an existing, task-appropriate glove, not as a stand-alone solution

Developed through extensive partnerships with industry experts, “The Shield” is expected to perform both to a high standard and under extreme workplace conditions. Therefore, it is imperative that it is kept in the best physical condition possible to ensure its benefits are realized. As such, it is recommended that it be returned to Superior Glove on a regular basis for hand pad replacement and strategic realignment of the armor plating.

### AVAILABLE IN

HPNG/LHO - Left Hand

HPNG/RHO - Right Hand

### APPLICATIONS

Prefabrication Assembly  
Framing  
Roofing

### INDUSTRIES

Construction
