### Description

Best® Butyl/Butyl II rubber provides superior resistance to highly corrosive acids, amines, ketones and esters. This synthetic rubber also provides the highest permeation resistance to gases and water vapors of any protective material used to make gloves. Used for many years to protect from chemical warfare agents, Butyl rubber gloves are often used in Homeland Security applications and by the military for protection from toxic gases. Best Butyl II provides the ultimate combination of protection and dexterity. We use only the finest quality butyl rubber in the production of our Best Butyl gloves.
