pre·fense™

It's a Game CHANGER

Used By Front Line Professionals

Patent #6613755

High-Level Alcohol-Free Moisturizing Foam Sanitizer

Fight Infectious Pathogens All Day!
One Dose Lasts up to 24+ Hours
or 10 Hand Washes

Prefense™

vs

Other Sanitizers

Last for 24 hours	Gone in seconds
Silica/water based	Alcohol based
No-mess foam	Can stain
Moisturizes skin	Dries out skin
Safe for everyone	Toxic & flammable
Penetrates Dirt	Does not penetrate dirt
Hypoallergenic	Skin irritant
Surface Sanitizer	Not safe for surfaces

USED BY FRONT LINE PROFESSIONALS DURING EPIDEMICS

Prefense™ is a revolutionary patented hospital-grade hand sanitizer that protects against the transmission of all strains of staph, strep, E.coli, coronavirus, influenza/flu, MRSA and more with just one application daily!

The alcohol-free, non-toxic formula soothes and moisturizes the hands. Prefense's active ingredient binds to skin and dries into an invisible protective barrier that stands guard against infectious pathogens encountered throughout the day. If a germ transfer occurs, Prefense™ actively slices the cell wall of pathogens for up to 24+ hours or ten hand washings and destroys it.

Use Prefense™ to sanitize surfaces for protection that lasts up to 28 days! Simply dip, spray or soak and dry!

*Upgrade to the
new generation
of hand
sanitizers*

Prefense™ easily out-performs the competition.

Upgrade to the newest generation of hand and surface sanitizer to safeguard your staff against today's germs.

Active Ingredient FDA approved Amosilq (Benzalkonium Chloride/Silica Complex... 0.12%)

Benzalkonium Chloride (aka BAC) has been long considered by medical professionals for being one of the safest compounds. BAC has been used for the past 40 years in a wide variety of consumer and healthcare related antiseptic and antibacterial products including spermicidal foams, dinner wipes, ophthalmic, cosmetic and food preservatives
