TRUST and LOVE

Trusted by Hospitals Loved by Everyone

OUR STORY

Like many companies, SONO was founded as a unique solution to a particular problem.

Having been in the Ultrasound industry since 1998, our team had identified a pattern among doctors, sonographers, and their machines.

Unbeknownst to them, the disinfectant supplies they were using had been damaging their equipment. This not only posed a liability for the institutions using such machinery, but more importantly, it placed the patient at risk.

Their disinfectant products contained solvents such as alcohol, which not only destroyed pathogens on the surface of the equipment, but even the equipment itself. After all, solvents dissolve things. This translated to greater profits for the manufacturer due to the increased turnover of each machine.

Our founders convened and began researching what they could do to help.

After developing a functional disinfectant wipe, they took it a step further and pioneered a rigorous process for testing the material compatibility of their solution.

It worked.

Since then, SONO Wipes have become the de-facto standard for equipment after proving their effectiveness year-after-year.

Medical facilities, pregnancy centers, and other medical professionals now not only trust

and depend on SONO Wipes to maintain the integrity of their equipment, but also garner the confidence and comfort of their patients.

Today they are used extensively in a wide variety of applications, from the travel industry to the automotive, and everything in between.

SONO has invested a considerable amount of time, energy, and resources into ensuring that we are delivering a product made entirely in the USA that is not only effective for the medical community, but the global community.

So, thank you to all who have supported us over the years and those new to our organization as well. If you ever have any questions or concerns, please do not hesitate to reach out. We are always happy to help.

Sincerely,

Arman Semerjian, Chris Froian, and the entire SONO Family

DISINFECTING SURFACE WIPES

DISINFECTING WIPES CANISTER

Medical-Grade Wet Wipes

Effective against 99.9% of bacteria and kills viruses such as SARS-CoV-2 (cause of COVID-19), Norovirus, H1N1, and more.

Every area where staff, visitors, guests, customers and the general public convene, there are surfaces that need to be regularly cleaned and freed of dirt, grime, bacteria and viruses.

SONO® Disinfecting Surface Wipes are more effective, efficient and cost less than sprays and towels, making them the right wipe to use in any location.

Independently lab tested to quickly disinfect and EPA registered, SONO® Disinfecting Wipes are bactericidal, fungicidal and virucidal.

SONO® Disinfecting Surface Wipes are lint free, highly absorbent, and the water-based formula makes them safe to use on plastics, laminates, metals, Plexiglas screens and rubber surfaces.

Use our [EPA N-Listed disinfecting wipes](#) to encourage use and keep them stocked in areas such as:

- Hospitals, Ambulatory Care Centers,
- Medical & Dental Offices
- Day Care Centers, Nursing Homes
- Schools, Universities, Military Bases
- Fitness Centers, Spas, Hotels & Resorts
- Restaurants, Cafeterias, Grocery Stores,
- Food Processing Facilities
- Commercial Buildings, Offices, Homes

DISINFECTING SURFACE WIPES

DISINFECTING WIPES SOFTPACK

Medical-Grade Wet Wipes

Designed for quick access and portability.

Effective against 99.9% of bacteria and kills viruses such as SARS-CoV-2 (cause of COVID-19), Norovirus, H1N1, and more.

The world is full of germs. Every home and location people frequent has surfaces that get cleaned on irregular schedules. That's why it's important to protect yourself by wiping surfaces and objects before you touch them.

Just one SONO® Disinfecting Wipe eliminates odors and disinfects over 47 pathogens a variety of surfaces, so you can relax knowing what you have cleaned is safe to touch. From your table in a restaurant to the remote in your hotel room, SONO has you covered.

Our wipes are quaternary ammonium compound-based with a low VOC formulation that is ammonia, bleach and phosphate free. They also don't contain harsh solvents, added alcohol or strong oxidizing agents. So what does all of that mean? You don't ever need to wear gloves to use them and they're not flammable.

The benefit of a softpack is that it can be dropped in a purse or slid into a gym bag and ready to use in an instant. All of our softpacks are also resealable, so you won't find dry wipes a week, or even a year after the pouch has been opened.

DISINFECTING SURFACE SPRAY

DISINFECTING + CLEANING SURFACE SPRAY

One-Step Ready-To-Use

Hospital Disinfectant

A formulated hydrogen peroxide disinfectant made to kill germs in just 3 minutes.

Bad smells are a sign germs are present, so you don't want to just mask them with a product that won't eliminate the source of the problem. When you use SONO® Disinfecting Spray, it leaves rooms smelling fresh and stops the growth of bacteria and viruses in their tracks.

Perfect for hospitals and nursing homes, SONO® Disinfecting Spray cleans and deodorizes in one easy step while also killing tough germs like Norovirus and listed on the EPA N list for efficacy against SARS-CoV-2. The unique germ-fighting formula is powered by hydrogen peroxide and contains no abrasives or harsh chemicals and qualifies under the EPA's 'Designed-for-Environment' list. Aside from medical facilities, it's safe to use everywhere from homes to gyms to offices.

SONO® Disinfecting Spray kills 99.9% of mold, mildew, bacteria and viruses on nonporous surfaces. Use it to keep your patients, customers, employees, visitors and family safe with a quick spray on surfaces that get touched the most.

DISINFECTING ULTRASOUND WIPES

DISINFECTING ULTRASOUND WIPES

Medical-Grade Wet Wipes

Keep your ultrasound equipment germ-free while avoiding harsh chemicals that damage surfaces.

Seeing their baby kick for the first time on an ultrasound monitor is a special time for soon-to-be mom's. As they make plans and dream about what will happen months and years from now, keep them safe when they visit your office with SONO® Ultrasound Wipes.

In addition to making the clean up process simple after each appointment, SONO® Ultrasound Wipes are non-abrasive, so your equipment will still look and feel like brand new—even after hundreds of uses.

Disinfecting products made for multiple purposes can degrade sensitive ultrasound components, leaving them worn and possibly unsafe to use. SONO® Ultrasound Wipes are made in the USA using only the highest-quality materials specifically designed for ultrasound equipment.

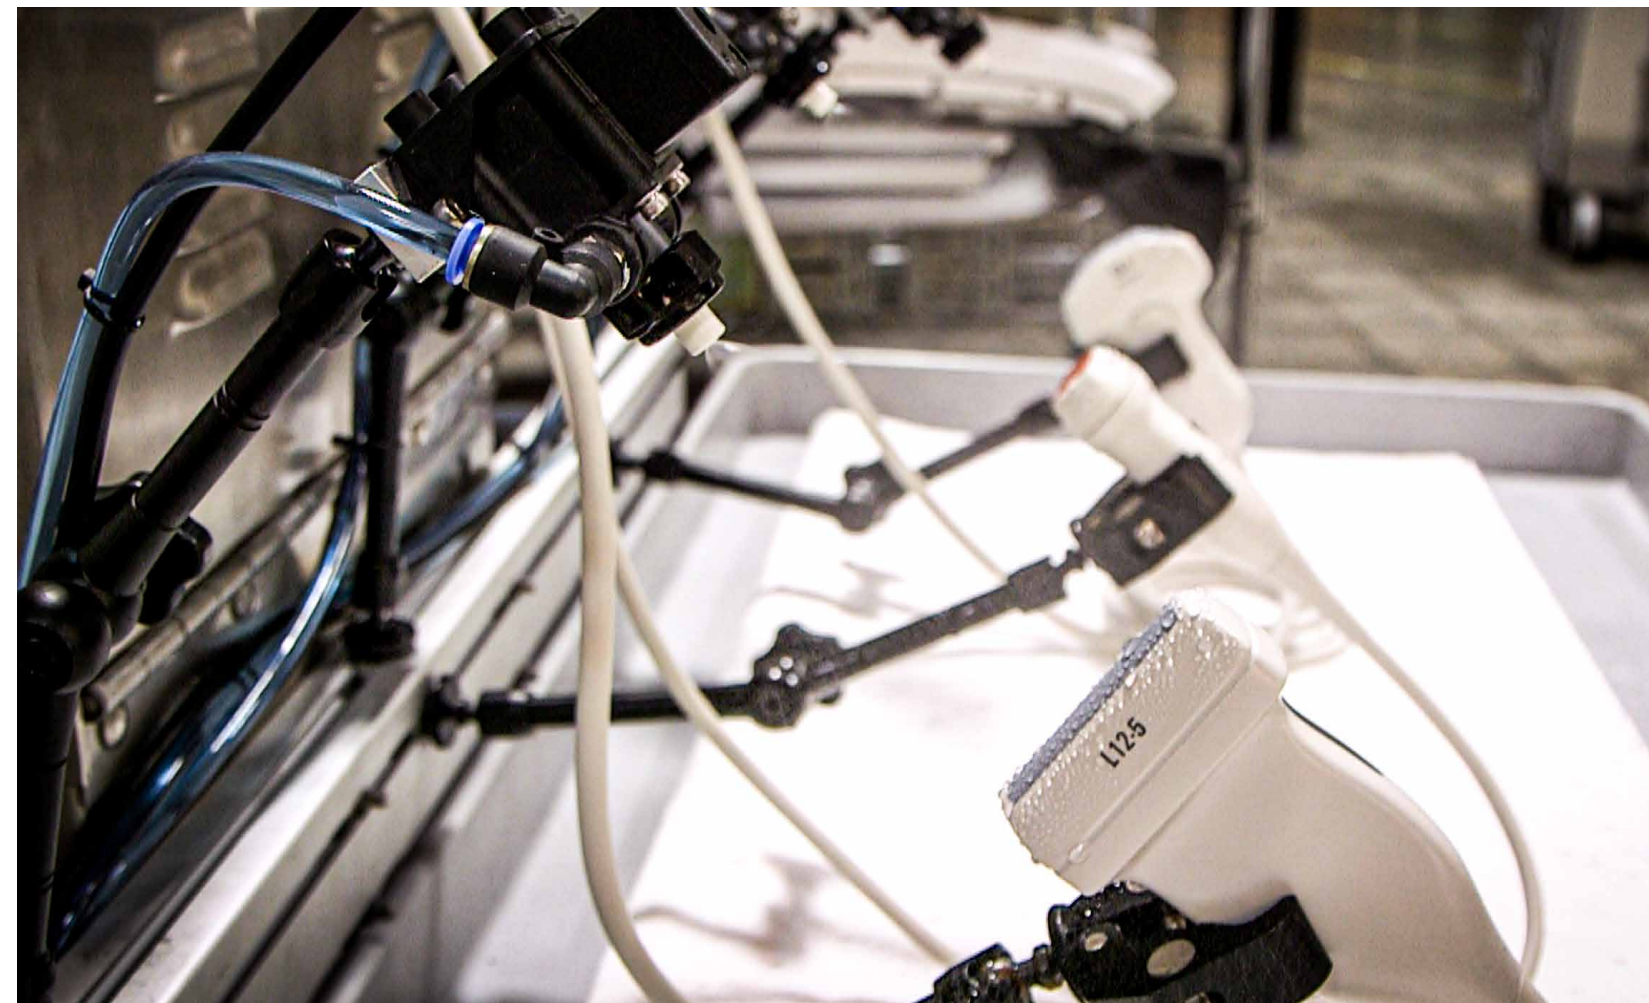

The antibacterial, antiviral, and antifungal formula found in each textured wipe efficiently picks up particles to quickly remove dirt, spots, and smudges while killing 99.9% of germs, bacteria, and viruses.

Keep your equipment and patients safe with SONO.

KEEP EQUIPMENT CLEAN, DISINFECTED, AND DAMAGE-FREE

What makes SONO different?

All of SONO's solutions are tested for compatibility in our state-of-the-art testing center. From medical devices to consumer products, SONO has tested it's proprietary formula against your most valuable investments.

THE PROOF IS IN THE QUALITY BZK SANITIZER

The Opposite Of Alcohol Hand Sanitizers

Living germ-free doesn't mean you have to live with dry and cracked hands.

Most hand sanitizer brands seem to be the same because they generally are. Their active ingredient is based on either isopropyl alcohol or ethyl alcohol. Alcohol is effective at killing germs, but it also evaporates quickly. That's why most hand sanitizers on the market will dry out your hands. Alcohol is also why most hand sanitizers sting if you have a cut or a scratch.

Benzalkonium chloride (BZK) is just as effective as alcohol at killing germs, but without the drawbacks mentioned above. It even allows for moisturizer and fragrances to be added to hand sanitizer formulas without reducing their germ-killing abilities.

SONO makes a foaming BZK hand sanitizer with bergamot oil that will leave your hands feeling refreshed and soft after every use. We also offer BZK hand sanitizing wipes with a gentle texture that sweeps away contaminants. Once you switch to BZK, you'll never want to put harsh alcohol products on your hands again.

Recent studies published in the Journal of Hospital Infection show the efficacy of Alcohol free BZK formulas against SARS-CoV-2 (COVID-19).

BZK HAND SANITIZING WIPES

BZK HAND SANITIZING WIPES

Keep Your Hands Germ-free Longer Without The Mess Of A Liquid Hand Sanitizer

Soft, silky hands don't always come from a bottle of lotion.

If you've used a liquid hand sanitizer before, it can be difficult to judge the right amount. If you use too little, you can't get it spread through all your fingers and around your hands. But if you use too much, it drips all over your clothes. SONO BZK hand sanitizer wipes give you the perfect amount every time.

Made in the USA using high-quality materials, the textured fabric makes it easy to see the dirt and grime being removed with each use. And since they're alcohol-free, they won't dry-out your hands or sting if you have a cut. This also means their moisturizing and germ-fighting effects will last longer than what you get from alcohol-based products that evaporate quickly.

Now more than ever, it's important for everyone to develop a habit of sanitizing their hands as frequently as possible. SONO BZK hand sanitizer wipes makes it easy to do it right.

BZK FOAMING HAND SANITIZER

BZK FOAMING HAND SANITIZER

**Germ-free Hands Without The Dryness
Caused By Alcohol**

Enjoy a light scent of bergamot oil and longer lasting protection than alcohol-based hand sanitizers

SONO Healthcare Foaming Hand Sanitizer is infused with a gentle moisturizer and bergamot fruit oil. With every use, it's like a spa day for your hands.

You're already familiar with bergamot fruit if you've ever taken a sip of Earl Grey tea. It's what gives it such a distinctive flavor. The fruit has a scent very similar to an orange, but it also contains a light floral note. You'll also find it as an ingredient in many perfumes and colognes, and it has been used for centuries as a natural remedy to treat stress and a number of skin conditions.

SONO Healthcare Foaming Hand Sanitizer is tough on germs, with laboratory tests demonstrating effectiveness against 99.9% of bacteria and viruses. It also meets the current Good Manufacturing Practices (cGMP) established by the FDA. You and your family can confidently use it to stay safe from the hazards your hands come into contact with every day.

SIMPLIFIED BUSINESS SAFETY

SIMPLIFIED BUSINESS SAFETY

The Cost Of Doing Business Now Includes Disinfection.

No matter what type of business you have, from restaurants to retail, fighting germs is the new bottom line.

In the food service industry, it has always been important to keep surfaces disinfected and sanitized. However, most other types of businesses were able to get away with a lot less effort. All of that has changed now.

Customer expectations include easy access to hand sanitizer and they want to see high-touch areas getting disinfected on a regular basis. You need something better than a just dirty rag to keep everyone safe.

SONO Healthcare makes hospital-grade disinfection and sanitization products that are safe to use in homes and businesses. All of our products are made in the USA and meet FDA and EPA regulations, so you can be certain your customers and employees are safe.

When you use SONO Hospital-Grade disinfecting and sanitizing products in your business, you are letting your customers know you have their best interest at heart.

SONO®
