Composite Knit Cut-Resistant Gloves  
with ZedCoat™ Palms

#S13TANT

TENACTIV™

Looking for outstanding protection against abrasion hazards and a strong grip in slippery work conditions? Meet your new favorite work glove: the green monster of abrasion resistance.

Thanks to their green ZedCoat™ palms, these Canadian-made gloves offer exceptional protection against a variety of workplace hazards. Made in-house, our ZedCoat™ flat nitrile palm coating provides unparalleled ANSI level 5 abrasion resistance – meaning that these gloves will protect your hands against even the harshest of abrasion threats. Additionally, when you wear these gloves, you'll also have a strong grip in wet work conditions: unlike foam nitrile, flat nitrile resists oils, solvents, and water with no permeation or leaking through the coating. Because of this, these gloves are an excellent choice for workers who handle sharp pieces of glass, oily sheet metal, or other wet materials.

In order to enhance the adhesion of the ZedCoat™, the glove shell has also been Factored™. The result is no delamination of the coating from the shell – even after the gloves have been laundered or worn for extended periods of time. Rest assured: this coating is built to last.

Made with TenActiv™ composite filament fiber yarn – a high performance, lint-free filament that is stronger than steel on an equal weight basis – these gloves are designed to meet a range of applications at a great price. Additionally, because of their ANSI level A3 cut resistance, these gloves are a great choice for those who require protection against medium cut hazards.

To limit the risk of allergic reactions, all of our Canadian-made gloves are now crafted with latex-free materials. As an added bonus, these gloves are also touchscreen compatible.

Tough enough to fight off even the harshest of abrasion hazards, our ZedCoat™ gloves will give you the abrasion resistance you need – without compromising your grip. Trust us: when you wear these gloves, your friends will be green with envy.

ABRASION

2007

CUT  
2016

PUNCTURE

1095 grams of cut protection.

## FEATURES

- ZedCoat™ palm coating provides phenomenal protection against abrasion hazards and withstands oils, solvents, and water
- TenActiv™ gloves feature lint-free, continuous filament yarn that is stronger than steel on an equal-weight basis
- Excellent ANSI level A3 cut protection
- ANSI level 5 abrasion resistance (as per ANSI/ISEA 105-2016 standard)
- Snug-fitting, breathable, flexible, and ergonomically-shaped
- Factored™ to prolong the life of the coating after laundering and extended use

## APPLICATIONS

Handling Sharp Objects  
Metal Stamping  
Construction  
Glass Plants  
Automotive Industry  
Aerospace Industry  
Metal Fabrication
