TenActiv™

Anti-Impact Hi-Viz Glove made with Black Widow™ Micropore Grip

#STAGYPNVB

The Black Widow™ Micropore Grip design utilizes the latest developments in 'micropore' technology by infusing the nitrile coating with millions of tiny pores. In simple terms, these pores displace oils and liquids when pressed against smooth surfaces, and create a kind of suction that further increases grip. Great comfort, dexterity and grip, and the perfect choice for work around sharp or jagged metal or handling oily parts.

Hi-viz, TenActiv™ composite seamless-knit shell. The shell is dipped over an ergonomically-shaped hand form, giving this glove unsurpassed comfort and dexterity while offering hi-viz advantages.

The addition of thermo plastic rubber (TPR) backing helps reduce back-of-hand injuries. TPR backing is sonically welded right onto the glove, rather than glued—meaning that it won't come off.

These gloves also provide ASTM level 4/CE level 5 cut protection, ASTM level 4/CE level 3 puncture resistance, and ASTM level 3/CE level 4 abrasion resistance -- meaning that they offer impressive protection against many different types of workplace hazards.

Featuring an ID label to personalize your gloves to reduce loss.

TENACTIV™

1875 grams of cut protection.

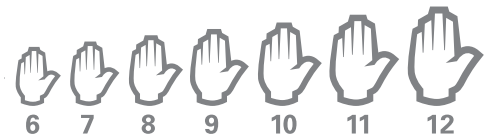

FEATURES

- Made with 13-gauge TenActiv™ yarn that is stronger than steel on an equal weight basis
- Hi-viz knit shell increases worker visibility on the job
- Impact protection thanks to thermo plastic rubber on back of hands, extending right to the fingertip to prevent injuries common in the oil and gas, and construction industries
- Black Widow™ Micropore nitrile coating provides excellent grip by displacing oil on slippery surfaces
