Superior Touch[®]

13-Gauge Camo Print Nylon Knit Gloves
with Polyurethane Palm Coating

Superior's camo-print gloves deliver big on aesthetic and function. A popular choice with both men and women, the camo trend is rising in popularity in the industrial market. We see no reason not to blend some design appeal into our functional glove construction.

From our Superior Touch[®] line, these 13-gauge nylon knit gloves offer great comfort and dexterity, and are the perfect choice for use in any fine assembly work where contamination is an issue. The addition of the polyurethane coated palms also strengthens grip and boosts puncture resistance – all without adding bulk or reducing touch sensitivity.

In addition to their eye-catching camouflage pattern and polyurethane coating, another advantage of these gloves is the non-linting filament nylon used in the seamless knit shell; the low particulate shedding of the polyurethane palm coating makes these gloves an excellent choice for use in any fine assembly work where contamination is an issue. They are also effective at protecting hands from nicks and minor cuts, while still allowing for a bare-hand feel during tasks where essential. DMF free.
