Impact Protection Kevlar® Blended  
Cut-Resistant Glove

#SKFGFNVB

One of our most popular gloves, now with thermo plastic rubber (TPR) backing to reduce back-of-hand injuries and offer impact protection. Cut-resistant 13-gauge knit shell is rated ASTM cut-level 4 / CE-level 5 in cut protection, enduring 2110 grams of cut force during testing. The blend features composite filament fiber encased with Kevlar® fiber for a boost in cut protection that won't come through to the hands. The nitrile palm coating adds puncture resistance, abrasion resistance and a good grip in wet or oily conditions. Seamless-knit shell is ergonomically-designed with a curved hand and finger shape for unsurpassed comfort and dexterity, and coating is applied while glove is on a hand mold for a true fit. TPR backing is sonically welded right onto the glove, meaning it won't come off.

Kevlar® is a registered trademark of E.I. du Pont de Nemours and Company.

2110 grams of cut protection.

## FEATURES

- Composite filament fiber wrapped with Kevlar® fiber provides great cut protection, since composite filament fiber boosts cut resistance without adding bulk and reduces cost
- Impact protection thanks to thermo plastic rubber on back of hands, extending right to the fingertip to prevent injuries common in this part of the hand; ergonomically shaped to the natural curves of the hand
- Foam nitrile palm coating functions exceptionally well by displacing oil on surfaces for superior grip when handling slippery objects

## APPLICATIONS

Oil and Gas  
Mechanical  
Construction
