

Custom fit solutions for a clear picture, increased productivity and superior infection prevention.

 **TIDIShield™**

COMPETITOR SHEATH

A competitor's camera sheath gives the dentist a blurry picture, making the view of the tooth difficult

TIDISHIELD™ BARRIER

A TIDIShield™ Custom Barrier, with its tight fit around the camera, provides a perfect view and superior infection prevention

NO SHEATH

Without a protective sheath, the intra-oral camera offers an unobstructed view, but with the threat of cross-contamination

TIDIShield™ Custom Fit Intra-Oral Camera Covers with *The SureClear™ Window*

- Custom fit eliminates distortion
- The SureClear Window™ provides superior image quality
- Unique, individually wrapped easy-peel outer wrapping protects inner sheath from contamination
- Extends the life of equipment by reducing the need for using harmful disinfectants on your intra-oral camera

See reverse side for a complete list of part numbers for the TIDIShield™ Custom Fit Camera Covers.

CUSTOM DIGITAL INTRA-ORAL CAMERA COVERS
