

TurtleSkin® SnakeArmor

The TurtleSkin Advantage

Most snake garments are heavy, stiff and bulky. TurtleSkin SnakeArmor's 6 oz. fabric is one-third the weight of other systems, yet tested to repel even large rattlesnakes. TurtleSkin SnakeArmor's patented technology produces the tightest weave ever made with high-strength fibers. Its weave is locked so tightly that snake fangs can't slip past, while TurtleSkin's tough ballistic fibers resist breaking. This results in an extremely protective fabric that is lightweight and flexible.

U.S. patents 5,565,264 and 5,837,623, as well as other patents pending.

Features

- **One-third the weight**
- **Certified results**
- **Water resistant**
- **Cool comfort**
- **Reversible**
- **Patented**

Tested with Live Snakes

The TurtleSkin SnakeArmor system was tested with live diamondback rattlesnakes, successfully repelling their strikes and venom. In addition, this system stopped a simulated snake strike of paired 0.05" diameter needles at 2.63 joules, and 0.042" diameter needles at 2.37 pounds with a penetration limit of 0.03".

Reversible Snake Gaiters

Protective Snake Pants

Total Protection Snake Chaps
